KIM

The second model – and first stand-mount – from the Fink Team stable, the KIM features a distinctive design that optimally combines a high-quality driver with an acoustically optimised cabinet, resulting in a natural soundstage and precise imaging. The speakers are meticulously crafted from premium materials, ensuring both aesthetic appeal and sonic performance.

The Fink Team KIM is a high-performance stand-mount loudspeaker that exemplifies superior engineering and elegant design. "The KIM competes on its own terms and has the balls," our review said, "and the finesse to challenge anything at or near its price. Or a fair few costing a good deal more, for that matter." It delivers an immersive listening experience that captures the nuances of live performances. Fink Team's KIM stand-mounter is a remarkable loudspeaker at any price.

Reviewed in Issue **197**

Fink Team is a distinguished German audio company known for its uncompromising approach to loudspeaker design. Founded by audio industry giant Karl-Heinz Fink and a team of highly-skilled audio engineers and acousticians, Fink Team emphasises natural sound reproduction, striving to create loudspeakers that embody musicality and clarity.

Fink Team is, first and foremost, recognised for its dedication to research and development, continuously exploring new technologies and materials to enhance audio fidelity. The company's products are extensively tested to ensure performance that meets the high standards of audiophiles and music lovers alike.

With a philosophy that values both sound integrity and design elegance, Fink Team has carved out a niche in the high-end audio market. As they continue to innovate, Fink Team's speakers are celebrated for delivering an immersive listening experience that captures the essence of live performance.
